8-Hour Supported Scaffold Safety Refresher Training

MANDATORY training requirement for individuals who completed the 32-HR Erector/Dismantler Supported Scaffold Training 4 years ago and are involved in the erection, dismantling, repairing, maintaining, or modifying any supported scaffold, with elevations greater than 40 feet in height.

TSC Training Academy is approved by the NYC Department of Buildings to offer the 32-hour Supported Scaffold Certificate of Completion training course, the eight (8) hour refresher course and the four (4) hour training course for supported scaffold users. These courses meet the intent of compliance with Local Law No. 52 and Article 10 of Subchapter 2 of Chapter 1 of Title 26 of the Administrative Code of the City of New York.

Since 2006 when Local Law 52 came into effect, the Department of Buildings announced that any individual who completed the 32-hr Supported Scaffold Training is required to complete the **8-HR Supported Scaffold Refresher training every 4 years** to update the erector/dismantler certification. You may view this information on the Department of Buildings website, www.nyc.gov/html/dob/downloads/pdf/scaffold_ll52_factsheet.pdf.

To comply with the DOB's supported scaffold refresher training requirements, TSCTA is NOW offering the 8-HR Supported Scaffold Refresher Training. The training will be offered in several languages such as English, Spanish, and Polish and will typically be provided in one, eight-hour class session, during the weekday or weekend; however, TSC is aware of the time sensitive needs of today's construction professional and will work with your organization to design the most suitable schedule possible. The scheduled programs are held at our convenient Long Island City Locations located on at 36-06 43rd Avenue or 5 Court Square, Long Island City, NY 11101.

Course Description:

The 8HR Supported Scaffold Refresher training is designed to provide an experienced worker with renewed knowledge of The New York City Building Code and relevant OSHA Standards. Built into training is a comprehensive overview of the five main hazards and control measures erector/dismantler may encounter while working with supported scaffolding such as:

- Fall Potential/Protection/Guard Rails/Personal Fall Arrest System
- Requirements for safe access and egress from supported scaffolds
- Fall Object (s)/donning of hard hats, overhead protection
- Electrocutation/Ground Fault Circuit Interrupters
- Collapse of equipment/base plates, mudsills

Training Requirements:

- TSCTA offers the 8HR Supported Scaffold Refresher Training at our LIC training center or on-site. We will require a minimum group size of 8 participants to confirm the training.

In order to receive a 8HR Supported Scaffold Refresher course completion card, all participants must provide the original 32-hr Supported Scaffold Training certification. If the participant misplaced the original, a copy of the 32-hr completion card will suffice. Each student must be able to demonstrate that the 32-hr Supported Scaffold training was completed 4 years ago before a full color, photo certificate of completion card is provided with a new expiration date.
