

# Aerial Lift Safety Awareness Seminar

**CEUs: 0.4**

**COURSE DESCRIPTION:**

An aerial lift is a device that enables access to hard-to-reach places by lifting a platform into the air. Cherry pickers and bucket trucks are examples of aerials lifts typically used by utility or construction workers to temporarily gain access to otherwise inaccessible locations. This course reviews and explains the basic safety rules associated with aerial lifts to help workers avoid accidents and injuries while working on or around aerial lifts.

**LEARNING OUTCOMES include:**

- Identify different types of aerial lifts and their basic functions
- Recognize causes of aerial lift accidents and ways to prevent them
- Describe key safety features of scissor lifts
- Discuss procedures for pre-shift inspection and operation of aerial lifts

**Please Note** that this session does not meet OSHA requirements for aerial lift operator training. The equipment manufacturer or rental company must provide operator training.

**COURSE COMPLETION:**

Students are required to complete 100% of the course and actively participate in all learning activities including the review quiz to receive the Aerial Lift Awareness Course Completion Certificate.
